The book is based on a study of over 1,000 young people in the United States, United Kingdom, and China. The authors found that young people are more likely than older generations to be:

- Entrepreneurial
- Collaborative

- Sustainable
- Socially conscious

These values are reflected in the way that young people are starting businesses, shopping, and consuming media. For example, young people are more likely to start businesses that are focused on social or environmental good. They are also more likely to shop at businesses that are sustainable and ethical. And they are more likely to consume media that is diverse and inclusive.

The authors argue that these changes are having a profound impact on capitalism. They are making capitalism more inclusive, sustainable, and democratic. And they are creating a new generation of leaders who are committed to making the world a better place.

The Future of Capitalism

The authors of *How Youth Culture is Reinventing Capitalism* believe that the future of capitalism is bright. They argue that young people are the ones who will create the new economy, and that this new economy will be more inclusive, sustainable, and democratic than the old one.

But the authors of *How Youth Culture is Reinventing Capitalism* are confident that young people will overcome these challenges and create a better future for themselves and for the world.
