Print length : 249 pages

In this comprehensive e-book, we present the latest advancements and evidence-based insights on cerebral herniation syndromes and intracranial hypertension. Written by a team of leading experts in the field, this book provides an in-depth exploration of:

- The pathophysiology and clinical manifestations of cerebral herniation syndromes

- The various imaging modalities used to diagnose and monitor intracranial hypertension
- The therapeutic strategies employed to manage cerebral herniation syndromes and intracranial hypertension
- The prognostic factors and outcomes associated with these conditions

This e-book is an essential resource for neurologists, neurosurgeons, intensivists, and other healthcare professionals involved in the care of patients with cerebral herniation syndromes and intracranial hypertension. It is also a valuable tool for researchers and students seeking to gain a deeper understanding of these complex conditions.

Key Features

- Comprehensive coverage of cerebral herniation syndromes and intracranial hypertension
- Evidence-based insights from leading experts in the field
- In-depth exploration of pathophysiology, diagnosis, management, and outcomes
- High-quality illustrations and clinical images
- Easy-to-navigate format with clear and concise language

Who Should Read This Book?

- Neurologists
- Neurosurgeons
- Intensivists

- Other healthcare professionals involved in the care of patients with cerebral herniation syndromes and intracranial hypertension
- Researchers and students seeking to gain a deeper understanding of these complex conditions

Table of Contents

- 1.
2. Pathophysiology of Cerebral Herniation Syndromes
3. Clinical Manifestations of Cerebral Herniation Syndromes
4. Imaging Modalities for Intracranial Hypertension
5. Therapeutic Strategies for Cerebral Herniation Syndromes and Intracranial Hypertension
6. Prognostic Factors and Outcomes
- 7.

About the Authors

The authors of this e-book are a team of leading experts in the field of neurocritical care and neurosurgery. They have extensive experience in the diagnosis and management of cerebral herniation syndromes and intracranial hypertension, and they are actively involved in research on these conditions.
